

CARE

Care is a natural next step for those who love their neighbors. The following acronym helps define the C.A.R.E. progression.

CONSIDER

Begin with listening. Each person is a unique creation. Hearing life from the perspective of those in need prepares us to serve.

RECALL

History, academia, science, and collaboration create common knowledge relating to conditions and opportunities.

AFFIRM

Helping those with needs to think of positives helps the healing process.

ENCOURAGE

Applying knowledge as an artist at appropriate times to current situations builds the future.

We CARE
